

ES&H Operations Committee

The structure and function of ATAP's safety organization is illustrated below. The ATAP ES&H Operations Committee reports to the **ATAP Division Director** and consists of the ATAP **Division Deputy for Operations**, **ES&H Coordinator**, and **Program ES&H Coordinators**.

The EHS Liaison / Health and Safety Representative, and representatives for matrixed personnel also participate. The EHS Liaison provides technical support to ATAP operations and coordinates requests for additional EHS services. The ES&H Operations Committee discusses ES&H concerns of the programs and projects, lessons learned from them, and information on lab-wide ES&H issues. The Safety Advisory Committee Representative, Radiation Safety Committee Representative, Laser Safety Committee Representative, and Laboratory Safety Representative act as liaisons between the ES&H Operations Committee and the LBNL Safety Committees.
